

GlucoPro

BULK CRUMBLES

GUARANTEED ANALYSIS

| | |
|---|-------|
| CRUDE PROTEIN, not less than | 37% |
| (Not more than 36.1% CPE derived from NPN in the form of AMMONIUM LACTATE) | |
| THIS FEED CONTAINS NO UREA | |
| LACTATE EQUIVALENT, not less than | 66% |
| CALCIUM (minimum) | 6.8% |
| CALCIUM (maximum) | 7.5% |
| FAT | 0.03% |
| FIBER | 1% |

INGREDIENTS:

Fermented Ammoniated Condensed Whey (FACW), beet pulp
Refer: (AAFOC 66.5), (FDA CFR 21.573)

DIRECTIONS FOR USE:

GlucoPro increases ration energy (NSC) density allowing ration formulation at a higher energy, lower grain (starch), or higher forage levels. Ideal for transition cows because lactate produces glucose needed to properly metabolize mobilized body fat reserves. Mix **GlucoPro** with feeds such that the total protein from NPN does not exceed 30% of the total dietary protein. Assure adequate time for rumen microbes to adjust to this concentrated energy and protein source.

WARNING: FEED TO RUMINANT ANIMALS ONLY
